

# Calculation Policy

**St Laurence's**  
CE Primary School

A guide for teachers

'Mathematics is a creative and highly interconnected discipline essential to everyday life. A high-quality mathematics education provides a foundation for understanding the world, the ability to reason mathematically, an appreciation of the beauty and power of mathematics, and a sense of enjoyment and curiosity about the subject' -

National Curriculum, 2014

## **Introduction**

Our school uses the White Rose Hub's documents, who are leaders in the field of Mastery in Mathematics. This policy has been created to support the White Rose materials and our children at St. Laurence's.

This policy is a statement of the aims, principles and strategies for teaching and learning of calculation strategies in Mathematics. It is designed to help teachers and staff at St. Laurence's ensure that calculation is taught consistently across the school and to aid them in helping children who may need extra support or challenges.

The policy is set out in the four operations; addition, subtraction, multiplication and division. Within each specific area, there is a progression of skills, knowledge and layout for written methods, which have been organised into the appropriate year groups. The calculation strategies, which will be used, will reflect this ideology using concrete, pictorial and abstract recordings leading to more formal written methods. Mental methods and strategies will work in partnership with these methods.

The progression of mental methods and expectations complies with the National Curriculum Statements from July 2014.

At St. Laurence's it is important that staff always use correct mathematical language and encourage this from every pupil. This will take place in guided practice and oral and written feedback.

The basis of our maths calculation policy is that written methods are complementary to mental methods and should not be seen as separate from them. Children should use mental methods when appropriate, but calculations that they cannot do in their heads they use an efficient written method accurately and with confidence.

## **Developmental Aims**

- ⇒To ensure consistency and progression in our approach to calculation and enable a smooth transition between year groups.
- ⇒As children begin to understand the underlying ideas they develop ways of recording to support their thinking and calculation methods, use particular methods that apply to special cases.
- ⇒To enable children to learn to interpret and use the signs and symbols.
- ⇒As children acquire secure mental methods of calculation and one efficient written method of calculation for addition, subtraction, multiplication and division, which they know they can rely on when mental methods are not appropriate.
- ⇒To ensure that children can use these methods accurately with confidence and understanding.
- ⇒At whatever stage in their learning, and whatever method is being used, children's methods of calculating will be underpinned by a secure and appropriate knowledge of number facts, along with the mental skills that are needed to carry out the process and judge if it was successful.

All year groups will offer CPA to children

	EYFS/Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
Addition	<p>Y1- Up to 100 Combining two parts to make a whole: part whole model</p> <p>Starting at the bigger number and counting on</p> <p>Regrouping to make 10 using ten frame</p>	<p>Adding three single digits</p> <p>Use of Dienes to combine two Numbers in columns to match the written method in year3.</p>	<p>Use place value counters alongside the compact written method.</p>	<p>Column method- regrouping  (up to 4 digits)</p>	<p>Column method- regrouping</p>	<p>Column method- regrouping</p>
Subtraction	<p>Taking away ones</p> <p>Counting back Find the difference</p> <p>Part whole model</p> <p>Make 10 using the ten frame</p>	<p>Counting back</p> <p>Find the difference Part whole model</p> <p>Make 10</p>	<p>Use place value counters alongside the compact written method.</p>	<p>Column method (up to 4 digits)</p>	<p>Column method</p>	<p>Column method</p>

All year groups will offer CPA to children

<p style="writing-mode: vertical-rl; transform: rotate(180deg);"><b>Multiplication</b></p>	<p>Recognising and making equal groups</p> <p>Doubling</p>	<p>Arrays- showing commutative Multiplication</p> <p>2x, 3x, 4x (doubling) 5x, 10x</p>	<p>Arrays, grid method and column method.</p> <p><math>2d \times 1d</math></p>	<p>Use the grid method (with arrays) alongside column multiplication</p> <p>(2 and 3 digit multiplied by 1 digit)</p>	<p>Compact multiplication</p> <p>(up to 4 digit numbers multiplied by 1 or 2 digits)</p>	<p>Compact multiplication</p> <p>(multi-digit up to 4 digits by a 2 digit number)</p> <p>Extend multiplication to mass, length, capacity etc.</p>

# YR Addition +

# Y1 Addition +

Objective / Strategy	Concrete	Pictorial	Abstract
<p>Combining two parts to make a whole part: part -whole model</p>	<p>Add two numbers together as a group or in a bar (Other resources e.g. eggs, shells, teddy bears, cars)</p>  <p>Use part whole model.</p> 	<p>Use pictures to add two numbers together as a group or in a bar to represent the concrete tool</p> 	<p>Use the part-part whole diagram as shown above to move into the abstract.</p> <p><math>4 + 3 = 7</math> <math>7 = 4 + 3</math></p>  <p><math>4 + 3 = 7</math> Four is a part, 3 is a part and the whole is seven.</p>
<p>Starting at the bigger number and counting on</p>	<p>Start with the larger number and then count on to the smaller number 1 by 1</p> 	<p>Start at the larger number on the number line and count on in ones or in one jump to find the answer.</p> <p><math>4 + 3 = 7</math></p> 	<p>Place the larger number in your head and count on the smaller number to find your answer</p> <p><math>4 + 3 = 7</math></p> <p>What is 3 more than 4? What is the total of 3 and 4?</p>

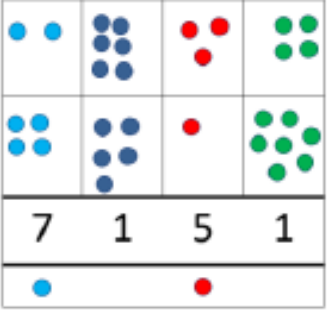

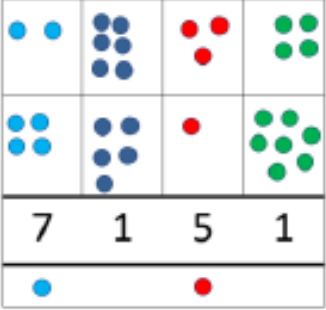

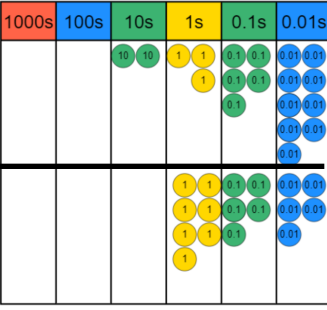

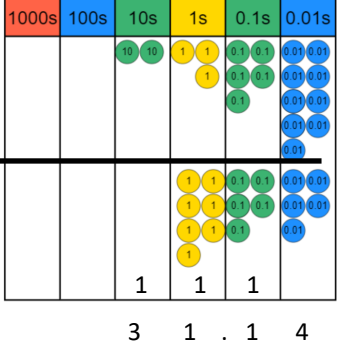

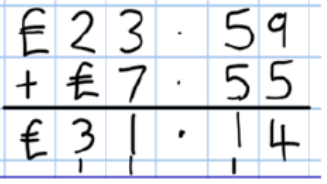

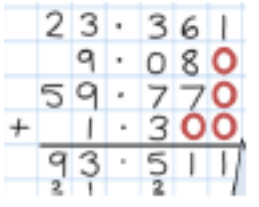

# Y1 Addition +

# Y2 Addition +

# Y2 Addition +

# Y3 Addition +

# Y4,5,6 Addition +

Objective / Strategy	Concrete Counters, place value counters	Pictorial - Drawing counters on a place value grid	Abstract Compact method
<p>Y4</p> <p>Add numbers with up to 4 digits</p>	<p>Use counters on a place value grid <math>2634 + 4517 = 7151</math></p> 	<p>Draw representations using place value grid</p> 	<p>Move from expanded method onto carrying hundreds as well as tens</p> <p>Relate to money and measures</p> $\begin{array}{r} 2634 \\ + 4517 \\ \hline 7151 \\    \end{array}$
<p>Y5</p> <p>Add numbers with more than 4 digits</p> <p>Add decimals with 2 decimal places with regrouping, including money</p>	<p>Bring the counters down to add <math>23.59 + 7.55 = 31.14</math></p> 	<p><math>23.59 + 7.55 = 31.14</math></p> 	
<p>Y6</p> <p>Add several numbers of increasing complexity.</p>	<p>As Year 5</p> <p>Including adding money, measures and decimals with different decimal points</p>	<p>As Year 5</p>	<p>Insert zeros for place holders</p> 

# YR Subtraction

Have an understanding of what “less and fewer” means and be able to say what is one less than a given number.

Children begin to use objects, pictures and concrete apparatus to relate subtraction to taking away and counting how many objects are left

Solve simple problems using fingers and introduce Numicon where appropriate.

Children make a record in objects, pictures, words, Numicon shapes or symbols of subtraction activities already carried out

Children are encouraged to read number sentences aloud in different ways

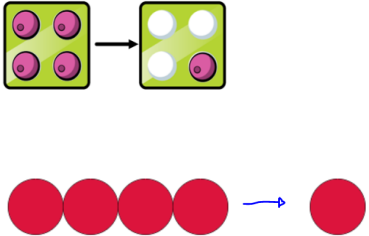

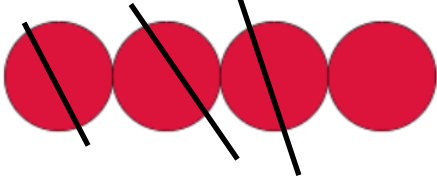

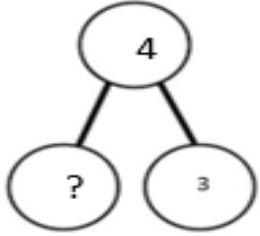

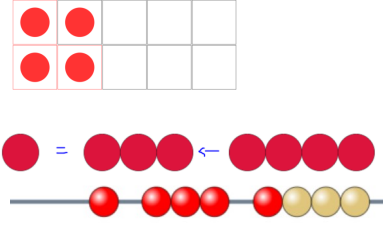

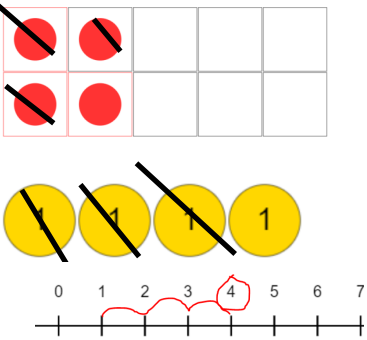

“Seven take 5 is 2” “7 subtract 5 makes 2”  $7 - 5 = 2$

Construct number sentences verbally, or by using cards to go with practical activities

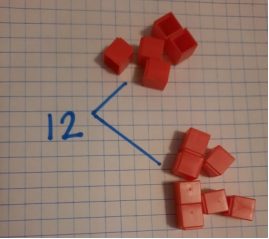

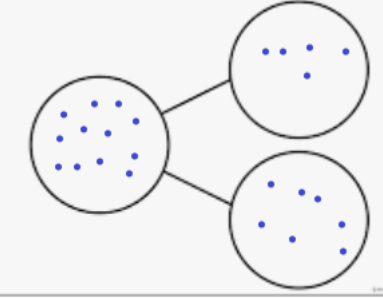

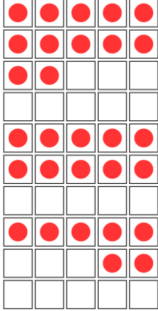

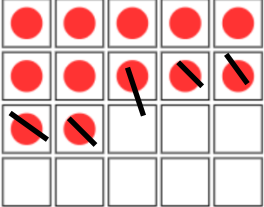

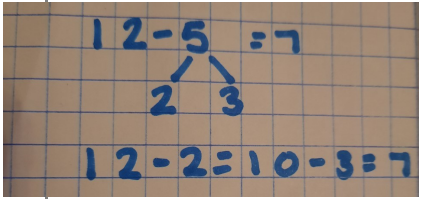

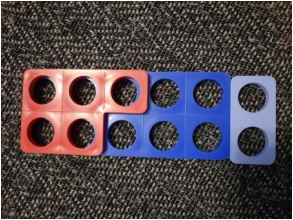

Number lines can be used alongside practical apparatus to solve subtraction calculations and word problems “jump” back to “count down” the number line

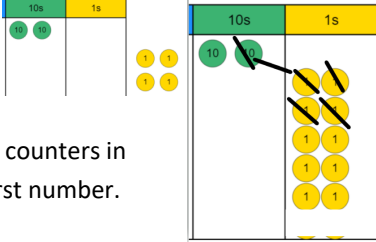

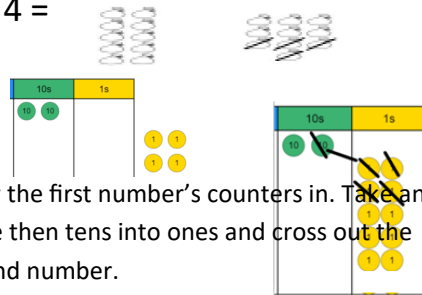

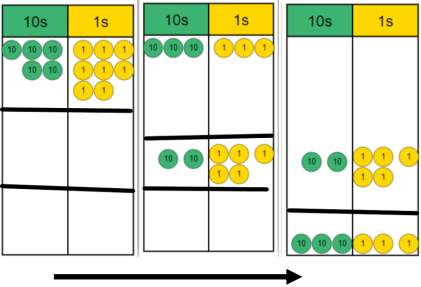

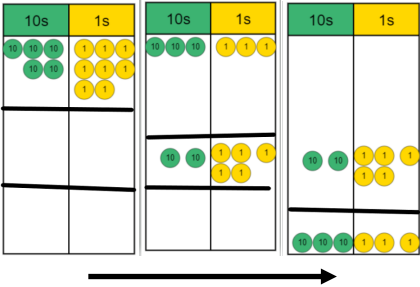

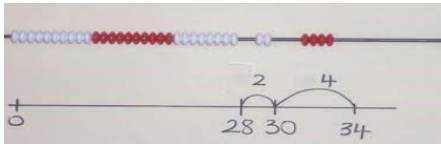

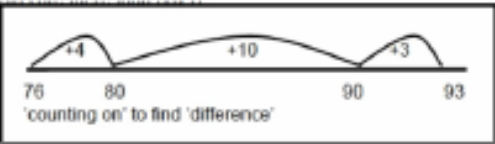

# Y1 Subtraction -

Objective / Strategy	Concrete Tens frame, numicon with pegs, cubes, bead string	Pictorial Pictures, number line	Abstract Number sentences
Taking away ones	$4 - 3 = 1$ 	$4 - 3 = 1$ 	 $4 - 3 =$ $\underline{\quad} = 4 - 3$
Counting back	Move objects/beads away from the group, counting backwards $4 - 3 = 1$ 	$4 - 3 = 1$ 	Encourage children to use an empty number line  Put 4 in your head, count back 3. What number are you at?
Find the Difference	Calculate the difference between 4 and 3.	Count on using a number line to find the difference between 4 and 3 	Hannah has 4 sweets and her sister has 3. How many more does Hannah have?

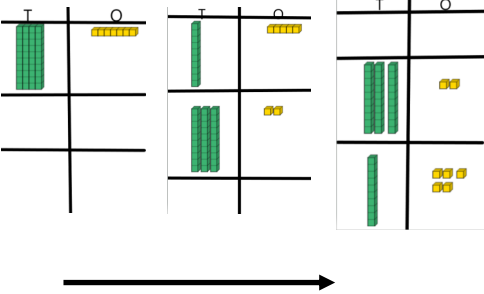

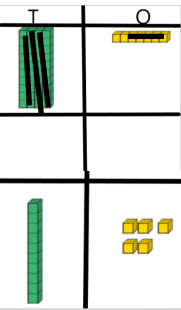

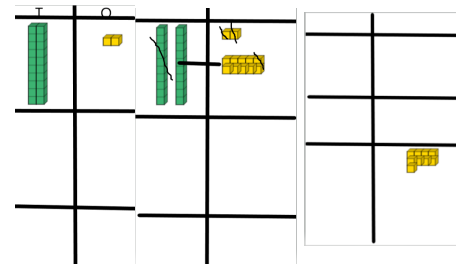

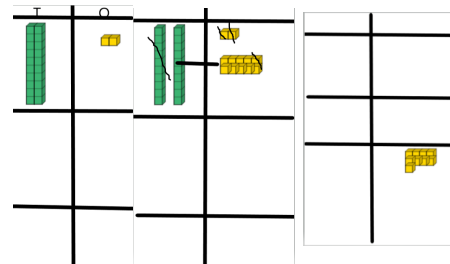

# Y1 Subtraction

Objective / Strategy	Concrete Part whole model with cubes/counters, tens frame	Pictorial Part whole model, tens frame	Abstract Number sentence, missing numbers, part whole model
<p>Represent and use number bonds and related subtraction facts within 20</p> <p>Part Part Whole model</p>	<p>If 12 is the whole and 5 is one of the parts, what's the other part?</p> 		<p>Move to using numbers within the part whole model</p> 
<p>Making 10</p>	<p>Using ten frames.</p> <p><math>12 - 5</math></p>  <p>-2 first to make 10</p> <p>-3</p>	<p>Children to present the ten frame pictorially and discuss what they did to make 10</p> 	<p>Children to show how they can make 10 by partitioning</p> 
<p>Bar model</p>	<p><math>12 - 5 = 7</math></p> 		<p><math>12 - 5 = 7</math></p> <p><math>12 - 7 = 5</math></p> <p><math>5 + 7 = 12</math></p>

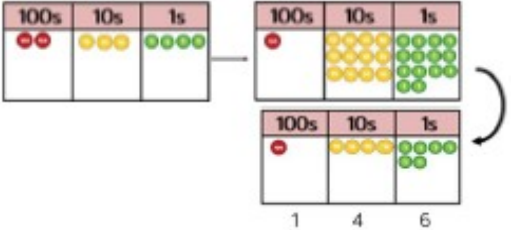

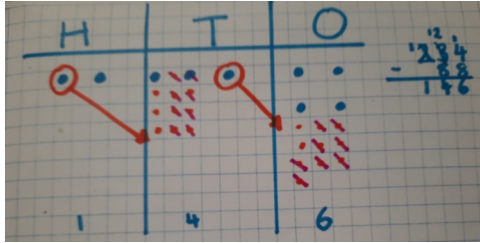

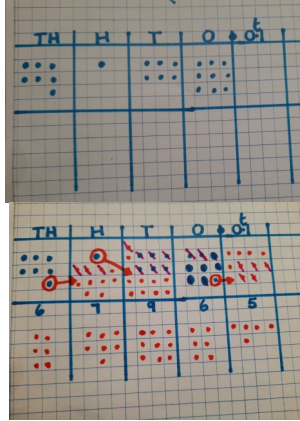

# Y2 Subtraction -

Objective / Strategy	Concrete Dienes, bead string, counters	Pictorial Place value grid, pictures	Abstract
Regroup a ten into ten ones using Take and make	$20 - 4 =$  <p>Place the counters in for the first number.</p> <p>Take and make the tens into ones and take the second number away.</p>	$20 - 4 =$  <p>Draw the first number's counters in. Take and make then tens into ones and cross out the second number.</p>	$20 - 4 = 16$
Partitioning to subtract without regrouping	$58 - 25 =$ 	$58 - 25 =$ 	$58 - 25 =$
Make ten strategy <i>Progression should be crossing one ten, crossing more than one ten, crossing the hundreds.</i>	Use a bead bar or bead strings to model counting to next ten and the rest 	Use a number line to count on to next ten and then the rest 	$93 - 17 =$

# Y3 Subtraction -

Objective / Strategy	Concrete - Dienes, numicons with pegs, place value counters	Pictorial Base ten, counters	Abstract Compact method
<p>Column subtraction without regrouping</p>	<p>47—32</p> 	<p>47—32</p> 	<p>Compact method</p> $\begin{array}{r} 47 \\ - 32 \\ \hline 15 \end{array}$
<p>Column subtraction with regrouping</p> <p>Begin with Dienes Move to place value counters, modelling the exchange of a ten in o ones. Use the phrase 'take and make' for exchange</p>	<p>22—13</p> 		<p>Compact method</p> $\begin{array}{r} 22 \\ - 13 \\ \hline 9 \end{array}$

# Y4,5,6 Subtraction

Objective / Strategy	Concrete Place value counters	Pictorial Base ten	Abstract Compact method
<p>Y4</p> <p>Subtract with up to 4 digits</p> <p>Introduce decimal subtraction through context of money</p>	<p>Model process of exchange using Dienes and then move to place value counters</p> <p>234 – 88</p> 	<p>234 – 88</p> 	<p>Formal column method. Children must understand what has happened when they have crossed out digits</p> <p>Use the phrase ‘take and make’ for ex-change</p> $\begin{array}{r} \overset{2}{2} \overset{1}{3} 4 \\ - \quad 88 \\ \hline \quad \quad 6 \end{array}$
<p>Y5</p> <p>Subtract with at least 4 digits, including money and measures</p> <p>Subtract with decimal values</p>	<p>As Year 4</p>	<p>7169 – 372.5</p> 	<p>Use zeros for place-holders</p> $\begin{array}{r} \overset{7}{7} \overset{1}{1} \overset{6}{6} \overset{9}{9} \overset{0}{0} \\ - \quad \overset{3}{3} \overset{7}{7} \overset{2}{2} \overset{0}{0} \overset{5}{5} \\ \hline \overset{3}{3} \overset{8}{8} \overset{9}{9} \overset{2}{2} \overset{8}{8} \end{array}$ $\begin{array}{r} \overset{7}{7} \overset{1}{1} \overset{6}{6} \overset{9}{9} \overset{0}{0} \\ - \quad \overset{3}{3} \overset{7}{7} \overset{2}{2} \overset{0}{0} \overset{5}{5} \\ \hline \overset{3}{3} \overset{8}{8} \overset{9}{9} \overset{2}{2} \overset{8}{8} \overset{5}{5} \end{array}$
<p>Y6</p> <p>Subtract with large and more complex numbers and decimal values</p>	<p>As above</p>	<p>Pictorial representation of dienes will always be drawn the same way. Lines for the tens and small circles for the ones</p>	$\begin{array}{r} \overset{7}{7} \overset{1}{1} \overset{6}{6} \overset{9}{9} \overset{9}{9} \\ - \quad \overset{8}{8} \overset{9}{9} \overset{9}{9} \overset{4}{4} \overset{9}{9} \\ \hline \overset{6}{6} \overset{0}{0} \overset{7}{7} \overset{5}{5} \overset{0}{0} \end{array}$ $\begin{array}{r} \overset{7}{7} \overset{1}{1} \overset{6}{6} \overset{9}{9} \overset{9}{9} \text{ kg} \\ - \quad \overset{3}{3} \overset{6}{6} \overset{0}{0} \overset{8}{8} \overset{9}{9} \text{ kg} \\ \hline \overset{3}{3} \overset{8}{8} \overset{9}{9} \overset{3}{3} \overset{9}{9} \text{ kg} \end{array}$

# YR Multiplication x

The link between addition and multiplication can be introduced through doubling and reinforced through repeated addition of the same number

Children begin with mostly pictorial representations

Real life contexts and use of practical equipment to count in repeated groups of the same size

Count in twos, fives and tens, both aloud and with objects, such as Numicon or other concrete apparatus

Children are encouraged to read number sentences aloud in different ways

“Five groups of two makes ten” “Three lots of two makes six”

Children are given multiplication problems set in a real life context and are encouraged to visualise the problem

“How many fingers on two hands?”

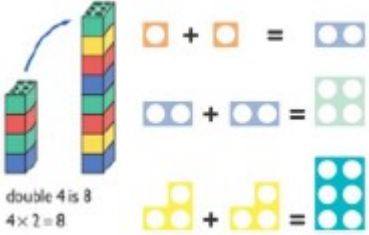

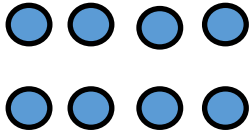

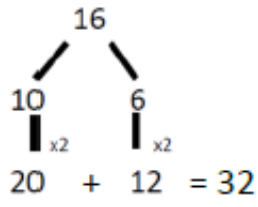

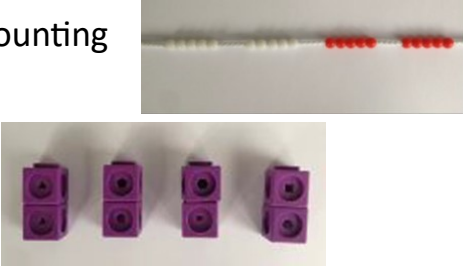

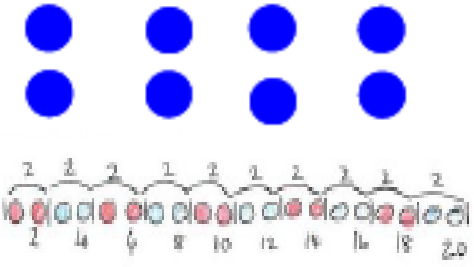

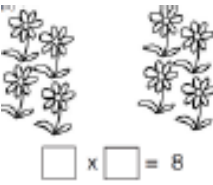

“How many dots on 3 die (5s) ?”

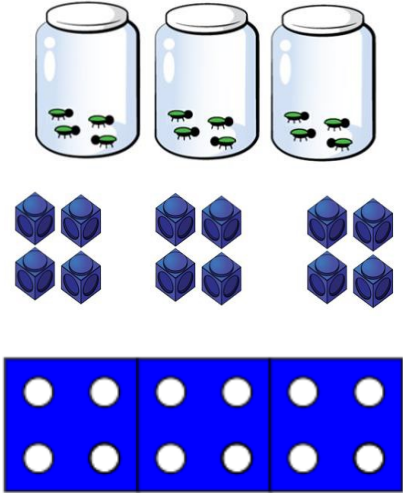

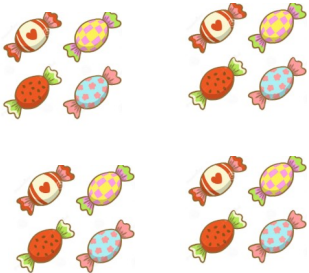

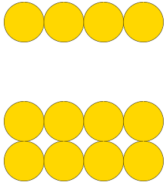

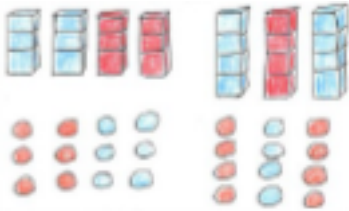

“How many legs on four ducks?”

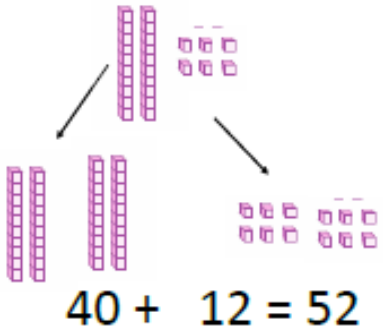

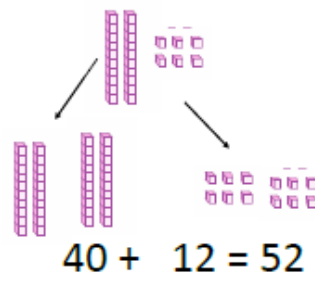

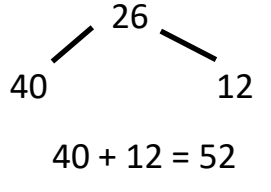

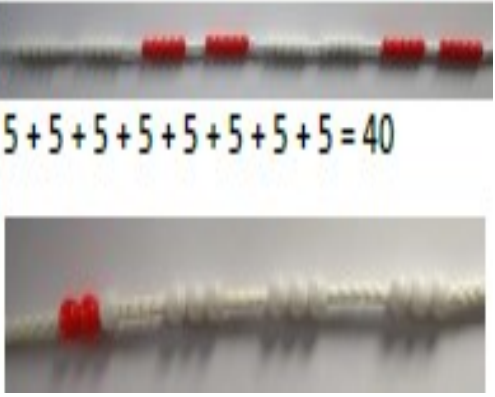

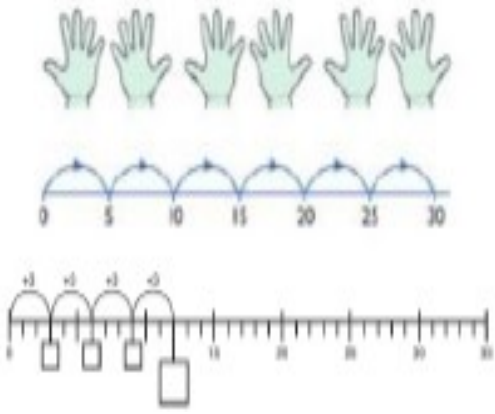

# Y1 Multiplication x

Objective / Strategy	Concrete Cubes, numicon, bead string, counters	Pictorial Counters, numberlines	Abstract
Doubling	Use practical activities using manipulatives including cubes and Numicon to demonstrate doubling 	Draw pictures to show how to double numbers  Double 4 = 8 	Partition a number and then double each part before recombining it back together  
Counting in multiples	Count the groups as children are skip counting, children may use their fingers as they are skip counting 	Children make representations to show counting in multiples  	Count in multiples of a number aloud  Write sequences with multiples of numbers.  2, 4, 6, 8, 10  5, 10, 15, 20, 25, 30
Making equal groups and counting the total	Use manipulatives to create equal groups 	Draw and make representations  	$2 \times 4 = 8$

# Y1 Multiplication x

Objective / Strategy	Concrete - Tool	Pictorial - Picture	Abstract
Repeated addition	<p>Use different objects to add equal groups</p> 	<p>Use pictorial including number lines to solve problem</p> <p>There are 4 sweets in a bag. How many sweets in 5 bags?</p> 	<p>Write addition sentences to describe objects and pictures</p> $3 \times 4 = 12$ $4 + 4 + 4 = 12$
Understanding arrays	<p>Use objects laid out in arrays to find the answers to 2 lots 4, 4 lots of 6 etc</p> 	<p>Draw representations of arrays to show understanding</p> 	$3 \times 4 = 12$ $4 \times 3 = 12$

# Y2 Multiplication x

Objective / Strategy	Concrete - Tool	Pictorial - Picture	Abstract
<p>Doubling</p>	<p>Model doubling using Dienes and place value counters</p>  <p><math>40 + 12 = 52</math></p>	<p>Draw pictures and representations to show how to double numbers</p>  <p><math>40 + 12 = 52</math></p>	<p>Partition a number and then double each part before recombining it back together</p>  <p><math>40 + 12 = 52</math></p>
<p>Counting in multiples of 2, 3, 4, 5, 10 from 0</p> <p>Repeated addition</p>	<p>Count the groups as children are skip counting, children may use their fingers as they are skip counting</p>  <p><math>5 + 5 + 5 + 5 + 5 + 5 + 5 + 5 = 40</math></p>	<p>Number lines, counting sticks and bar models should be used to show representation of counting in multiples</p> 	<p>Count in multiples of a number aloud</p> <p>Write sequences with multiples of numbers</p> <p>0, 2, 4, 6, 8, 10</p> <p>0, 3, 6, 9, 12, 15</p> <p>0, 5, 10, 15, 20, 25, 30</p> <p><math>4 \times 3 = \square</math></p>

# Y2 Multiplication x

# Y3 Multiplication x

## Objective / Strategy

Grid method strategy to be moved to written method.  
2d x 1d only

## Concrete Counters and dienes

When using arrays for multiplication, encourage children to find out how they can total the arrays without counting each counter.

## Pictorial Counters, base ten, arrays

I know  $2 \times 7$  is 14

And I know  $3 \times 7 = 31$

## Abstract Grid method, column method

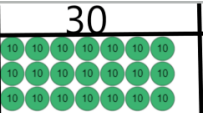

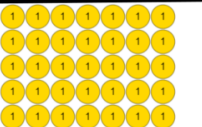

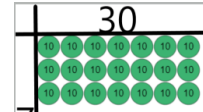

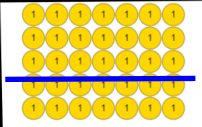

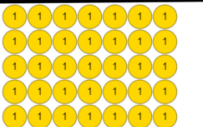

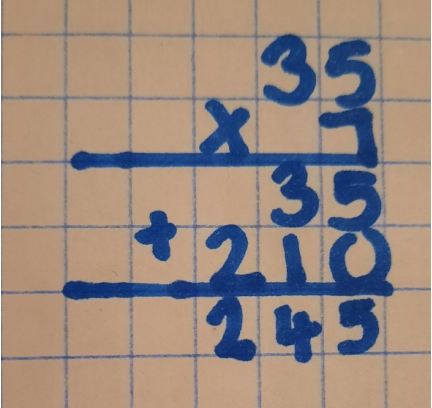

Start with multiplying by one digit numbers and showing the clear addition alongside the grid

x	30	5
7	210	35

$$210 + 35 = 245$$

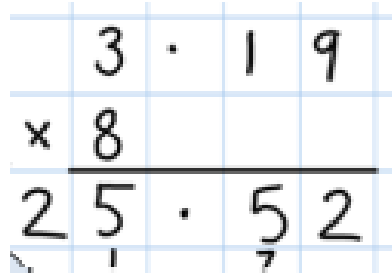

# Y4 Multiplication x

Objective / Strategy	Concrete Counters and dienes	Pictorial Counters, base ten, arrays	Abstract Grid method, column method

# Y6 Multiplication x

Objective / Strategy	Concrete Money, place value chart	Pictorial Money, place value chart	Abstract Written method
Multiplying decimals up to 2 decimal places by a single digit	This could be represented using place value counters using 0.1s, 0.01s, 1s and 10s or 1ps, 10ps and £1s.	This could be represented using place value counters using 0.1s, 0.01s, 1s and 10s or 1ps, 10ps and £1s.	Remind children that the single digit belongs in the ones column. Line up the decimal points in the question and the answer 

# YR Division

Division can be introduced through halving or sharing an equal amount into 2 groups

Children begin with mostly pictorial representations linked to real life contexts

**Grouping Model** Mum has 6 socks. She grouped them into pairs. How many pairs did she make?

Children need to see and hear representations of division as both grouping and sharing

Children begin with mostly pictorial representations linked to real life contexts

**Sharing Model** I have 10 sweets. I want to share them with my friend. How many will we have each?

Children need to see and hear representations of division as both grouping and sharing

Children have a go at recording the calculation that has been carried out

e.g. by drawing pictures in groups or by arranging concrete apparatus into groups.

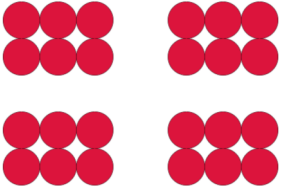

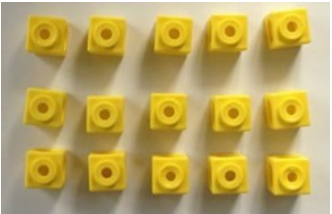

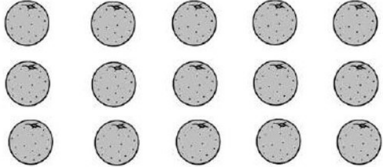

12 shared equally by 3 is 4

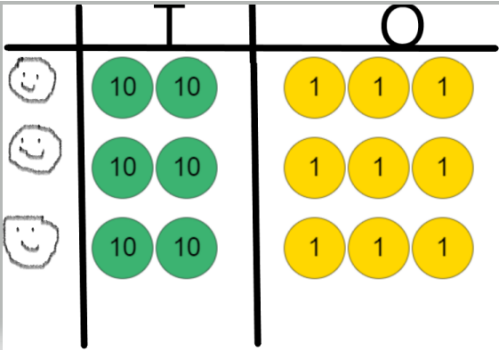

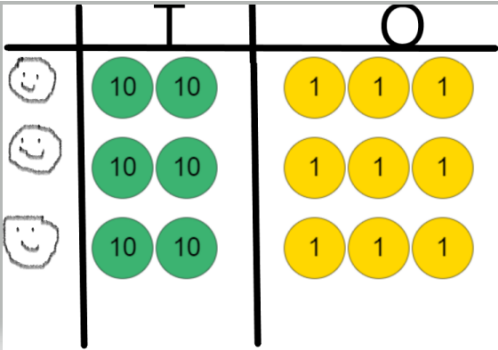

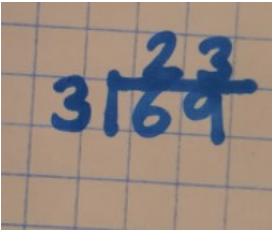

# Y1 Division ÷

# Y2 Division ÷

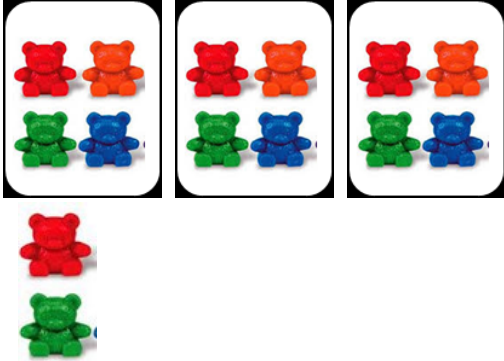

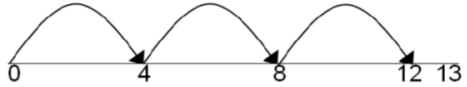

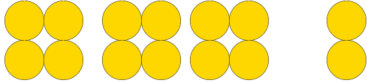

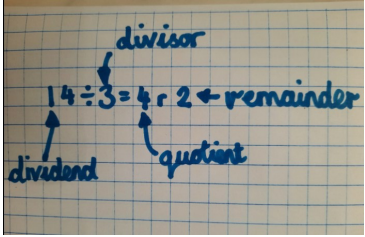

# Y3 Division ÷

Objective / Strategy	Concrete Cubes, counters, objects, place value counters	Pictorial	Abstract
Division as grouping	<p>Use cubes, counters, objects or place value counters to aid understanding</p>  <p>24 divided into groups of 6 = 4</p> 	<p>Children to use pictures or shapes to group quantities Relate to real life e.g. cinema seats</p> 	<p>How many groups of 6 in 24? <math>24 \div 6 = 4</math></p>
Division with arrays	<p>Link division to multiplication by creating an array and thinking about the number sentences that can be created</p>  <p><math>5 \div 3 = 5</math>      <math>5 \times 3 = 15</math> <math>15 \div 5 = 3</math>      <math>3 \times 5 = 15</math></p>	<p>Draw an array and use lines to split the array into groups to make multiplication and division sentences</p> 	<p>Find the inverse of multiplication and division sentences by creating eight linking number sentences</p> <p><math>3 \times 5 = 15</math> <math>5 \div 3 = 5</math> <math>15 = 3 \times 5</math> <math>3 = 15 \div 5</math></p>

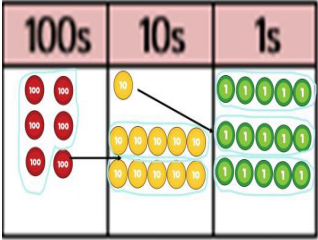

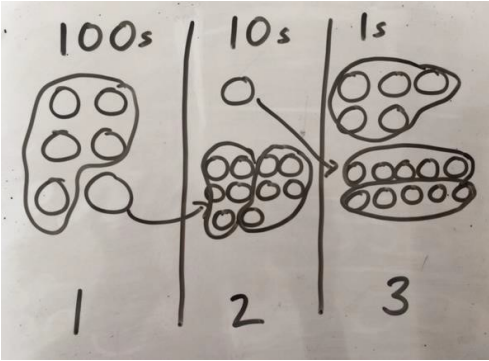

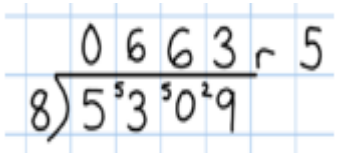

# Y3 Division ÷

Objective / Strategy	Concrete Place value counters, dienes	Pictorial Counters, base ten	Abstract Short method
Division without remainders	<p><math>69 \div 3 = 23</math></p> <p>When regrouping, move the counter into the next column to show the new digit.</p> 	<p><math>69 \div 3 = 23</math></p> <p>Draw the counters/base ten/ objects to share out when dividing.</p> 	<p>Link the short method to the Concrete and pictorial methods to show the link.</p> 

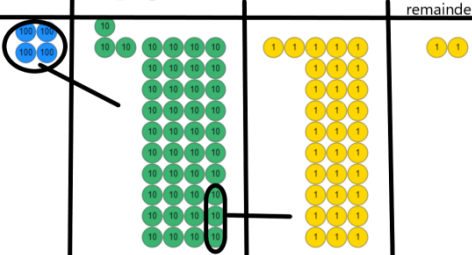

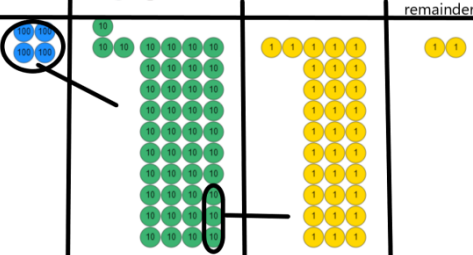

# Y3 Division ÷

Objective / Strategy	Concrete Place value counters, dienes, other objects	Pictorial Counters, base ten	Abstract Short method								
Division with remainders	<p>Divide objects between groups and see how much is left over</p> <p><math>14 \div 3 =</math></p> 	<p>Jump forward in equal jumps on a number line then see how many more you need to jump to find a remainder</p>  <p>Draw dots and group them to divide an amount and clearly show a remainder</p>  <table border="1" data-bbox="1072 895 1541 1002"> <tr> <td colspan="4" style="text-align: center;">14</td> </tr> <tr> <td style="text-align: center;">4</td> <td style="text-align: center;">4</td> <td style="text-align: center;">4</td> <td style="text-align: center;">2</td> </tr> </table>	14				4	4	4	2	<p>Complete written divisions and show the remainder using r</p>  <p>Use the bus stop method for numbers over the multiple of 10. e.g. <math>34 \div 3 =</math></p> <p>34 is larger than the first multiple of 10.</p>

4	4	4	2								

# Y4,5,6 Division ÷

Objective / Strategy	Concrete Place value counters, dienes	Pictorial Counters, base ten	Abstract Short method
Divide at least 3 digit numbers by 1 digit  Short Division	Short division using place value counters to group $615 \div 5$  $\begin{array}{r} 123 \\ 35 \overline{) 615} \\ \underline{35} \phantom{0} \\ 26 \phantom{0} \\ \underline{21} \phantom{0} \\ 50 \\ \underline{50} \\ 0 \end{array}$ <ol style="list-style-type: none"> <li>1. Make 615 with place value counters.</li> <li>2. How many groups of 5 hundreds can you make with 6 hundred counters?</li> <li>3. Exchange 1 hundred for 10 tens.</li> <li>4. How many groups of 5 tens can you make with 11 ten counters?</li> <li>5. Exchange 1 ten for 10 ones.</li> <li>6. How many groups of 5 ones can you make with 15 ones?</li> </ol>	Represent the place value counters pictorially   Additive decomposition	Children to the calculation using the short division scaffold. Begin with no remainders $\begin{array}{r} 123 \\ 5 \overline{) 615} \\ \underline{5} \phantom{0} \\ 11 \phantom{0} \\ \underline{10} \phantom{0} \\ 15 \\ \underline{15} \\ 0 \end{array}$ Move onto divisions with a Remainder $\begin{array}{r} 86 \text{ r } 2 \\ 5 \overline{) 432} \\ \underline{40} \phantom{0} \\ 32 \\ \underline{30} \\ 2 \end{array}$ Finally move into decimal places to c $\begin{array}{r} 123 \\ 35 \overline{) 615} \\ \underline{35} \phantom{0} \\ 26 \phantom{0} \\ \underline{21} \phantom{0} \\ 50 \\ \underline{50} \\ 0 \end{array}$ 

# Y4,5,6 Division ÷

Objective / Strategy	Concrete Place value counters, dienes	Pictorial Counters, base ten	Abstract Short method
<p>Divide at least 3 digit numbers by 1 digit</p> <p>Short Division</p>	 <p>How many group of 5 can I make in each column?</p> <p><math>432 \div 5</math></p> <p>Group the place value chart according to the divisor, children should make links using their multiplication facts.</p>	 <p>How many group of 5 can I make in each column?</p>	<p>Move onto divisions with a Remainder</p> $\begin{array}{r} 86 \text{ r } 2 \\ 3 \overline{) 432} \end{array}$ <p>Finally move into decimal places to divide the total accurately</p> <p>Move on to larger numbers with decimal remainders.</p> $\begin{array}{r} 14.6 \\ 35 \overline{) 511.0} \end{array}$

# Y6 Division ÷

Objective / Strategy

Concrete and Pictorial  
Place value counters, dienes

Long division  
 $2544 \div 12$

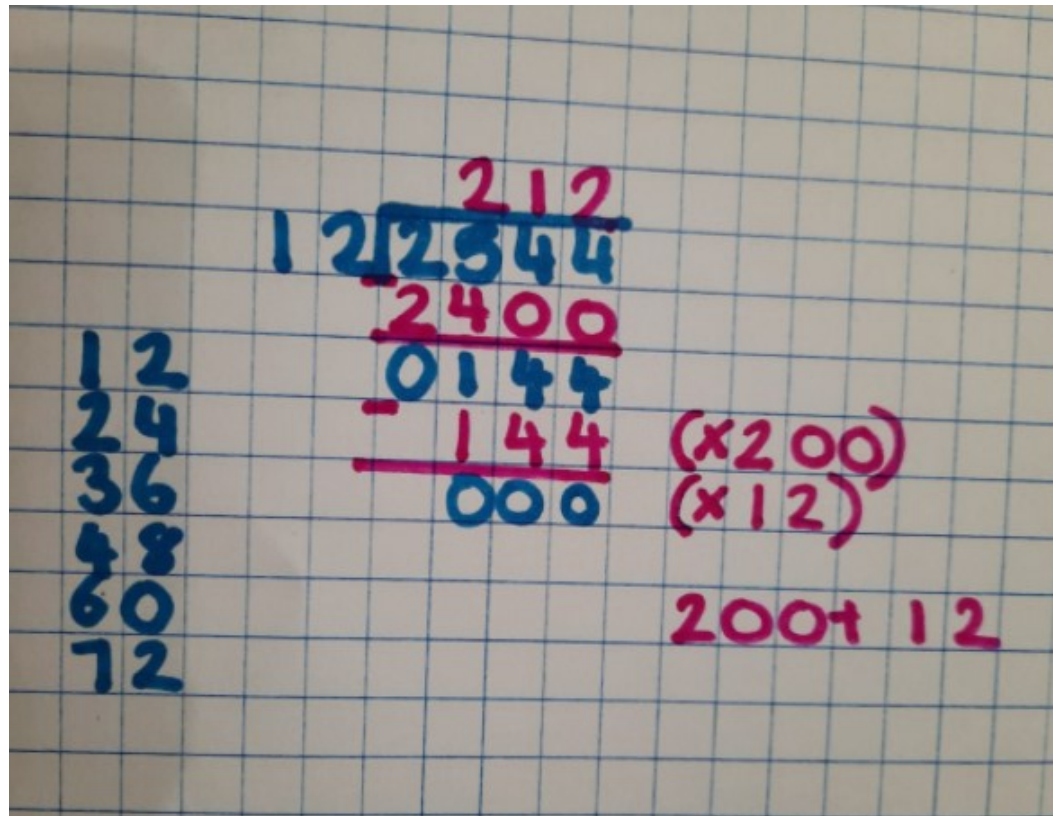

# Y6 Division ÷

Objective / Strategy

Abstract

Long division

Encourage children to use multiplication facts to find efficient ways of finding the answer.

E.g. I know  $12 \times 2 = 24$ , so  $12 \times 200 = 2400$
